

Number : MIP-100033-012-12/1490
Subject : Berthing Window Application

21.05.2019

Reference : Announcement No. MIP. 100033-012-1/52 dated 04.01.2019

Due to the intensive berthing demand which our terminal has recently faced, along with the general increase in existing services vessel sizes, the fact that final move counts per vessel are considerably above the proforma move counts previously provided, and operational difficulties at other East Mediterranean ports also affected by the Ramadan season; the current Berthing Window application has been suspended starting from 21.05.2019 until further notice.

Berthing Windows of existing services with proforma max. vessel drafts above 12.75m as per our latest announcement dated 04.01.2019 will continue to be applied due to operational obligations caused by the limited number of berths which can serve these services.

The berthing order of other vessels will be organized according to port arrival and berthing request.

MIP will continue to determine the berthing order considering berth specifications, the condition and specifications of equipment on the berth and of others which will serve the vessel, the vessels length and draft, weather conditions and all other operational conditions.

Best Regards,

Alessandro BECCE
Chief Operations Officer
