

Number: MIP-100033-723-11/3090

07.10.2021

Subject: HES Code Control at Entrances of the Port

To whom it may concern,

With the decision taken by Port Local Authority, HES Codes started to be checked at the entrances to port area starting from 16.08.2021 within the framework of the precautions taken due to the Covid-19 Pandemic, against which our country and all the World is struggling for a while.

HES Codes will be checked at **all the entrances** to the port area including the outer Terminals (TOKI and Terminal 2), and also the MIP buildings out of the port area (Administrative and Operation Buildings) starting from 18.10.2021.

In order to avoid a possible congestion at check points, it is vital that all the related people who will enter the port area create HES Codes (**valid for min 1 year**) in advance and keep it ready before entrance.

Within the framework of the decision by Port Local Authority, the persons not showing HES Codes will not be allowed to enter the above-mentioned areas.

For your very kind information.
